

School Demographic Profiler

SCHOOL DEMOGRAPHIC PROFILER

The School Demographic Profiler is a program that has been developed to allow a school to find other schools with similar demographics in Reading and Mathematics. The tool is available with 2006 data. This data does not contain any Augmented NRT data for either the Reading or Mathematics information.

These demographic variables are available for your comparison and search:

- White Tested for Reading
- African-American Tested for Reading
- Hispanic Tested for Reading
- Asian Tested for Reading
- Limited English student Tested for Reading
- Free Reduced lunch Tested for Reading
- Disabled Tested for Reading

- White Tested for Math
- African-American Tested for Math
- Hispanic Tested for Math
- Asian Tested for Math
- Limited English student Tested for Math
- Free Reduced lunch Tested for Math
- Disabled Tested for Math

Once a school is discovered that is close to yours in size and range of percent of students tested in one or more of the demographic variable categories, that information may be exported to excel, printed in a report, or displayed by double-clicking on the school name the name, address, phone, etc. concerning that school is displayed.

Start the Program

The School Demographic Profiler must be copied from the CD to your computer or from the web site before trying to execute the application. Your Desktop is a good location to copy the School Demographics Profiler to.

The program name is **School_Demographic_Profiler2006.mdb** which is an Access database.

From the Main Menu screen, the District and School are chosen.

Quit Next >

Find a Similar School

The next screen contains the variable, range, and school size choices. The demographic variable that is chosen will be **highlighted** in that column.

In this example, the Percent of Limited English Students that were Tested for Reading is 2.

The Range is how far from the 2% LEP students that you want to allow.

The School Size reflects those schools within 50 students of your student body size.
